- Completed independent project in Functionup Summer of Code (FSOC) with mastery in Frontend development, earning positive recognition for high-quality deliverables.

INTERNSHIP

JAN 2021- Mar 2021

- Worked as a Backend WordPress Developer on E-commerce Website
- Optimized the Website Speed by 90%, Which Affects Website Rankings.
- Demonstrated expertise in troubleshooting live websites by resolving complex database errors, ensuring seamless functionality and customer satisfaction.
- I have Done a Lot of Product and Price Listing And Also Integrated Payment gateway.

PROJECT

Twitter Clone

17 Jan 2023 to 10 Feb 2023

(REACT JS, HTML5, CSS3, JAVASCRIPT, RECOIL JS)

- Designed and developed a Twitter clone in React JS using modern frontend technologies used Recoil Js for state management.
- Implemented core features of Twitter, such as the ability to post tweets, follow and unfollow users, and like or retweet tweets.
- GitHub Link - <https://github.com/kameshwar44/TwitterClone.git>
- <https://twitterclone-reactjs11.netlify.app/>

Employee Management Portal

21 Jan 2023 to 02 Feb 2023

(REACT JS, HTML5, CSS3, JAVASCRIPT, RECOIL JS, JSON SERVER)

- Using React JS, I created a dynamic and user-friendly interface that enables HR managers to easily add, edit, and delete employee records.
- The portal displays key information such as employee name, job title, salary, and department in a visually appealing and organized manner.
- GitHub Link - <https://github.com/kameshwar44/Employee-management-portal.git>
- <https://employee-management-portals.netlify.app/>

Google Docs Clone

01 Mar 2023 to 06 Mar 2023

(REACT JS, HTML5, CSS3, JAVASCRIPT)

- Developed a clone of Google Docs with full functionality.
- Implemented features for underlining, bolding, and italicizing text and many more.
- GitHub Link - <https://github.com/kameshwar44/Google-Docs-Updated.git>
- <https://google-docs-clone11.netlify.app/>

Responsive Weather App

15 Feb 2023 to 20 Feb 2023

(REACT JS, HTML5, CSS3, JAVASCRIPT)

- Implemented real-time data visualizations using weather APIs. Enabled users to search for current weather in cities.
- Integrated various weather API's to gather and display accurate weather data.
